

DR. PRICE'S Cream Baking Powder

A PURE, WHOLESOME, RELIABLE
CREAM OF TARTAR BAKING POWDER

Cream of tartar is derived from grapes. It is used in Dr. Price's Baking Powder in the exact form and composition in which it occurs in that luscious, healthful fruit. The healthfulness of Dr. Price's Cream Baking Powder is beyond question.

NO ALUM, NO LIME PHOSPHATES

In every one of fifty-two different brands of alum and alum-phosphate baking powders recently officially analyzed Sulphuric Acid was reported in large quantities, frequently greater than twenty-five per cent. of the whole weight of the baking powder!

Chemical tests show that a portion of the alum from alum baking powder remains as such and unaltered in the bread. Read the Label

Las Cruces and Mesilla Valley

VALLEY FARMERS MAKE HOGS PAY

American Bend Neighborhood Becomes Center of Pork Raising Industry.

Las Cruces, N. M., Nov. 17.—The farmers of the American Bend neighborhood, about 12 miles north of here, have made a big success in raising hogs this year. The hogs were raised on alfalfa and the waste from the farms until the last crops were turned out in the alfalfa and corn fields and allowed to forage for themselves.

A number of the growers are now beginning to market the animals and are bringing them to town all ready for the market. John Stewart has brought in five fine ones; J. M. Forbes the same number, and H. C. Newberry has contracted to deliver five more next week.

These men have had no trouble in selling the animals at a good figure, ranging from 10 cents to 15 cents per pound. There are at present about 500 head in the American Bend neighborhood and next year will see an increase in that number.

MESILLA FARMERS' INSTITUTE PLANNED

Las Cruces, N. M., Nov. 17.—The Mesilla Valley Produce exchange has decided to hold a series of farmers' institute meetings during the coming winter, one meeting to be held each month. At these meetings subjects of interest to every farmer and fruit grower will be discussed fully.

The first meeting for this year will

For the Woman That's Fat.

A Detroit physician says that the cheapest and safest mixture a fat woman who wants to get thin can use is 1/2 ounce Marmola (get it in the original 1/2-ounce package), 1/2 ounce Fluid Extract Cascara Aromatic and 3 1/2 ounces Peppermint Water. The proper amount to take is a teaspoonful after meals and at bedtime.

These ingredients may be obtained from any druggist at small cost, and make a combination that is not only excellent as a fat reducer, being able, it is claimed, to take off a pound a day without causing wrinkles, but is also a splendid help to the system as a whole, regulating the stomach and bowels (where the fat person's troubles begin), and clearing the skin of pimples and blotches. No exercise is required to help the remedy in its work and, best of all, no dieting is necessary while taking it—you can eat what you like.

change in their new building near the Santa Fe depot.

DONA ANA LIKES NEW ARRANGEMENT

be held on Saturday afternoon, Nov. 19, at 2 o'clock at the offices of the El Paso County, N. M., Nov. 17.—The members of the bar in this county are very well pleased over the new judicial district as it is embodied in the constitution now being formed at Santa Fe. The new division places Dona Ana county with Lincoln, Otero and Torrance, all of which are situated geographically right in regard to each other. It will be easier on the judge and the lawyers in attending court in the different counties than it is at present with this county joined to Grant and Socorro.

The apportionment of one member of the senate and two members of the house from this county alone has also been received with much favor, as the people here believe that Dona Ana county being one of the largest and most important counties in the new state, is entitled to separate recognition in the matter of the election of the law makers. The members of the Dona Ana county delegation are Judge F. W. Parker, Isidoro Armijo, Charles E. Miller and W. E. Garrison. The delegates expect to return home the latter part of this week.

OUTLOOK IS GOOD AROUND LA UNION

Las Cruces, N. M., Nov. 17.—Sheriff Felipe Lucero returned yesterday from La Union and other points in the southern end of the county, where he had been for several days serving papers on parties to a suit over land which has been set before Judge Parker for Nov. 19.

Sheriff Lucero says the conditions in the lower part of the county are very encouraging, the farmers being now engaged in getting their land ready for next year's crops. All the land owners there feel much encouraged over the outlook. There is some water in the river at La Union but it is not being used, there not being enough to make it pay for putting into the ditches.

Considerable ground is being prepared for wheat and the acreage of that crop next year will be four times as large as for this or previous years.

STANDING OF TEAMS IN THE BILLIARD TOURNAMENT

Las Cruces, N. M., Nov. 17.—The results of the game played in the billiard tournament Tuesday night was as follows:

Gonzales 64, Miller 41; Broadbush 36, high run 5; Miller 41, high run 8; McBride 28, high run 4.

The standing of the teams at present is as follows, there being a total of 16 games for each team to play.

	Won	Lost	Ave.
Flint and Lopez	8	1	.888
Broadbush and Gonzales	3	1	.750
Sims and Cardinal	5	2	.714
Armijo and Laub	7	3	.700
Angel and C. D. Case	7	6	.528
Navarez and L. W. Case	2	2	.500
Bicarra and Willis	4	8	.333
Schneider and Ehle	3	7	.300
Miller and McBride	2	11	.154

The Beautiful Hair of English Women

(Annie Elly in N. Y. Graphic).

The long, abundant and glossy tresses of English women are not due to hair tonics and heroic shampooing. There is a general belief over there that the less water put on the hair, the better it is; they say wetting "takes the life out" and leaves the hair dull, brittle and colorless.

English women with hair rich in color, clean and wholesome and plenty of it—have told me they attribute it to dry shampooing two or three times a week. They mix four ounces of terebinth with four ounces of orris root and sprinkle a tablespoonful of this mixture on the head; then brush the powder thoroughly through the hair. They thus avoid the danger of catching cold and the discomfort that accompanies washing, rinsing and drying the hair.

This treatment keeps the hair light, fluffy and lustrous, and is the only thing I know that will actually produce the growth of hair.

FOOTBALL GAME IS CALLED OFF

Roswell Team Taunts A. & M. College With Being Afraid to Play.

Roswell, N. M., Nov. 17.—The Mesilla Park team, which had agreed to play the New Mexico Military Institute football in El Paso the Saturday after Thanksgiving, has wired to change the date to Thanksgiving day, to be played at Mesilla Park, or the engagement will be canceled.

Manager D. C. Pearson wired Supt. Miller, of Mesilla Park, to consider the El Paso game binding. Pearson said: "There is one chance in a hundred that Mesilla Park will win; that's why you are scared. You beat Socorro 14 to 4 and we beat Socorro 61 to 0."

FINAL DETAILS OF FAIR ARE ARRANGED

Las Cruces, N. M., Nov. 17.—A meeting of the various committees for the Agricultural Fair and livestock carnival to be held here tomorrow and Saturday, was held at the armory last evening. All the committees were represented and made reports, the indications being that the fair will be a big success in every respect.

ALPHEA KING ADDRESSES AGRICULTURAL STUDENTS.

Agricultural College, N. M., Nov. 17.—Oscar Snow, the alfalfa king of the Mesilla valley, addressed the Agricultural College students here yesterday morning. He spoke of the importance of alfalfa to the farmer, and the fact that farmers were not yet perfectly organized in the valley to get proper and just rights in the market. At the end of his talk he had a string of questions asked him about farming outlooks in the valley.

Physical director Mitchell, of the Y. M. C. A., at El Paso, gave a striking address to the local student, Y. M. C. A. He looked as if he was a "Man, a Christian and a Sinner." His subject was mainly along athletic lines and their coherence with Christianity.

A rousing student body meeting was held for the purpose of practicing yells and songs for Thanksgiving day, when we play the N. M. M. I. team.

"Get Roswell's Goat" club held a short meeting last night to arrange the plan of parading for Saturday night to Las Cruces to advertise the coming game.

Jeff Candler returned to school this week, and has been with his parents on a pleasure and hunting trip on the upper Gila river. They saw plenty of game.

ALPHEA KING ADDRESSES AND MINOR HAPPENINGS

Las Cruces, N. M., Nov. 17.—Clary & Dross, of the Rio Grande Valley Realty company, have moved their office from the Lohman block to the Main street occupied by T. S. Hunt.

Miss Helena Ross, of Fort Worth, Tex., is in Las Cruces, the guest of Mrs. Sumner H. Center, and will spend the entire winter here.

William Dessauer, has bought an automobile for his daughter, Miss Florence, and she has learned to run it.

Las Cruces, N. M., Nov. 17.—Catarino Armijo and family moved yesterday from the Armijo property on Main street to the property just east of Horton's photograph gallery.

The Las Cruces lodge of Elks will hold a regular meeting on Tuesday evening, November 22, at which the matter of the site for the new home will be definitely settled. There will also be an initiation, M. C. O'Hara, of this city, to be given the work. A light lunch will be served after the meeting.

One room of the new Riley block will be completed by December first and A. F. Katzenstein will move his soda water and confectionery stand into it. The large room, which is to be occupied by Manasse Brothers dry goods store, will not be ready until the

Married Life the First Year

Mabel Herbert Urner On The Mother-in-Law Again.

"HELEN, I don't think you keep this baby dressed warmly enough."

"Why, it has its little flannel skirt and jacket," Helen answered, rather shortly. She was growing somewhat restive under her mother-in-law's constant advice about the baby.

"Yes, but its little hands are cold now. I think these sheer linen dresses are too thin. I always had flannellette slips for my babies in the morning. Baby clothes should be plain and warm; it isn't necessary that they be so fancy. All this lace and hand tuck-ing is not going to make the baby any more comfortable."

Helen flushed. "I always thought everything about a baby should be dainty and fine. I don't think I would care to have my baby wear flannellette."

Grandma's Criticism. "Well, flannellette was quite good enough for your husband when he was a baby," stiffer. "I should think it would be good enough for his child."

"It isn't a question of it's not being good enough," answered Helen, quietly, trying to restrain her resentment, "but I prefer to see my baby in dainty things."

"Well, all these expensive dresses will soon be outgrown. You could have used your money to much better advantage than buying hand embroidered dresses for a very young baby. Warren's income is not large enough to warrant that."

"Warren wanted me to have everything for our baby the very daintiest and best," more hotly. "He did not think I had been extravagant."

Wholesome Advice.

"Oh, a man has no idea about such things! And, of course, at such a time he wanted to please you. I don't want to interfere, Helen, but I do think in the future you should buy the baby expensive clothes. When it is older and can appreciate nice things, that's time enough to have them. Just so it's clean and comfortable is all that's necessary now."

Just then Anna appeared at the nursery door with a large basket.

"The laundry, ma'am—\$2.25. The boy's waiting."

"Put it down there and bring me my purse. It's in the top drawer of my dresser."

Helen brought the purse and Helen gave her the money.

"Don't you always count your clothes

first of the year. The new May building will be completed and ready for occupancy about the first of February."

FOOTBALL TEAM LEAVES FOR TUCSON BATTLEFIELD.

Las Cruces, N. M., Nov. 17.—The football team of the New Mexico Agricultural college left yesterday for Tucson, Arizona, where they will play against the Arizona university boys on Saturday. This will be the last game for the New Mexico boys until the big game with the Roswell Military Institute team here on Thanksgiving day. This game will settle the championship of the Intercollegiate league for New Mexico.

The work of macadamizing the street between F. M. Hayner's property and that of the Manasse brothers is progressing rapidly and will soon be completed.

MARKING GRAVES OF SOLDIERS IN COUNTRY.

Las Cruces, N. M., Nov. 17.—S. M. Sherkey, commander of the local G. A. R. post, has been busy this fall in the endeavor to mark the graves of every soldier in and about the country. He is now in this county. The government is cooperating with him and is sending monuments with the name, company and date of death of each soldier as fast as Mr. Sherkey can secure the necessary records and data.

There are graves here, unmarked, of soldiers of the Mexican war, the Indian wars of the southwest, the civil war and the Spanish-American war.

HUNTERS LOSE ELEVEN HORSES IN MOUNTAINS.

Las Cruces, N. M., Nov. 17.—T. R. Raut, r. Frank M. Hayner and professor J. H. Squires have returned from a hunting trip of two weeks in the Mogollon mountains. The party consisted of 15 miles. After spending a few days at their first camp, they moved several miles farther into the heart of the mountains and at the new camp 11 of their horses got away and were lost.

At present there is a little over one to five hundred to recover them. The party secured five large bucks.

WATER IS DISAPPEARING, BUT ROAD IS STILL BAD

Las Cruces, N. M., Nov. 17.—The water which came down the arroyo at the end of the Alameda road about 10 days ago is gradually disappearing, although the road leading from the Alameda to Dona Ana is still practically impassable.

The ranch is almost clear of water, but is a mass of thick mud and the seven acre piece adjoining still has several inches of water upon it.

HALL WILL HAVE LEASBURG AND PUT IN CULTIVATION.

Las Cruces, N. M., Nov. 17.—Norwood Hall of El Paso, this morning made a trip to his ranch near the Leasburg dam. Mr. Hall has almost 200 acres of land there and is making contracts to have the entire place put into cultivation. At present there is a little over half of it being farmed, about 75 acres being in alfalfa.

PICKS DENVER GIRL AS MODEL OF WESTERN TYPE

Denver, Colo., Nov. 17.—Miss Alice Fletcher, a milliner of this city, has been chosen by Gustave Maury, the New York portrait painter, as a model of the western type of girl. She was born in Colorado and has lived in Denver the greater part of her life.

LOSES BREATHING TUBE, AND DIES LOOKING FOR IT

East Grand Forks, N. D., Nov. 17.—Oscar Johnson, of Merryfield died because he lost his silver tube used for breathing. He expired in the arms of a friend at the bottom of the stairs down which he had been speaking the tube which he lost while asleep.

when they come back from the wash?" Warren's mother asked severely.

"Why, I did, but since the baby came I have so little time."

"Then how do you know if they are all returned?"

"Oh, I have a very good laundress. I don't think she ever loses anything."

"Well, I must say, Helen, that is very careless. I always make a list when the wash goes out and then check it off when the clothes come back. And \$2.25—that's a great deal for just you three. You ought to get your laundry done cheaper than that."

"Why, I think that is very reasonable. The baby has a great many things and that includes the towels and sheets and pillow cases, and she does them very well."

Torn Clothes. Mrs. Curtis left her chair and crossed over to the laundry basket. "Well, she ought to at that price," as she lifted the cloth that covered the clothes. One of the baby's fine white dresses lay on top. She took it up critically. The lace on the little yoke was badly torn. She held it up for Helen to see.

"And you call this a good laundress?" severely. "She has simply ruined one of your hand-made dresses! Now what did I tell you about expensive baby clothes? It is a criminal waste of money. And here's another with the buttons torn off. And here's—"

Helen arose, the baby still in her arms, her eyes flashing angrily. "Mrs. Curtis, that is my laundry, and I will ask you not to go through it. If the clothes are torn I am very sorry, but I cannot wash them myself."

Asserting Herself. "I manage the best I can, and I would much prefer that you did not constantly scrutinize and criticize all that I do. And I think Warren would prefer it, too."

Mrs. Curtis left, highly indignant. After the first flush of anger had worn off Helen began to regret her words. After all, she was Warren's mother, and her advice was meant only for their good.

She picked up the little dress, got out her sewing basket, and sat down to mend it. Perhaps she did not manage very well, she thought sadly; perhaps about the baby's clothes she had been foolish and extravagant. But this was her first baby, and she was doing the best she could. And a mother-in-law's surveillance and criticism was very hard to bear.

REWARD FOR SUCCESSFUL INVENTIONS

(Continued from previous page.)

one attachments and improvements that have since been invented and patented. No such thing as an anti-jump riding device was dreamed of until the automobile came into popular use. When electricity first was applied in the field of transportation, not one patent among the thousands that now blaze the path of electrical progress was thought of. And now comes the flying machine. As soon as it becomes commercially practicable the patent office will do a land office business in patents on apparatus for the improvement of aerial navigation.

First Patent Centennial.

A great celebration was held in the city of Washington in 1891 in honor of the first centennial of American patent history. There were 450,000 patents then in the files of the patent office. Statesmen, inventors, publicists, all went into profound flights of spoken and written eloquence over the achievements of that century. They wondered and marveled at the tremendous progress of invention during the 100 years they were viewing in retrospect. Since then less than 19 years have passed; yet in those 19 years more patents have been applied for, and more have been issued, than in all the 100 years that went before.

So wonderful have been the strides of invention since the patent centennial that a new meaning has been given to the words of one of the speakers on the occasion who said: "Measured by what we learn and see and do and enjoy in a life-time, we live longer than Methuselah, are wiser than Solomon, richer than Croesus, and more powerful than Alexander—Aristotle has found his fulcrum; it is the inventor's brain."

Indirectly, the development of American inventive genius has been due to the fostering care of the American patent office. It makes it a fact that two-thirds of all the national wealth is the product of invention. There are now 41 general divisions in the patent office under which applications for patents are entered. These divisions are: 1. Mechanical, 2. Electrical, 3. Chemical, 4. Metallurgical, 5. Mineral, 6. Botanical, 7. Zoological, 8. Astronomical, 9. Geological, 10. Miscellaneous.

Each applicant for a patent pays a stated fee \$35, for his patent. This, with the other receipts of the patent office, makes it a self-supporting institution. Indeed, it is more than that, for it annually charges the inventors more than the cost of maintaining the patent system, and the total of these overcharges amounts now to \$5,000,000. In other words, the patent office is a money-making machine.

WITH The Exchanges

A GREAT DRIVER. From the Van Horn (Texas) Era: Red Blythe hauls his water eight miles and consumes four barrels per week.

AN EL PASO DRINK. From San Antonio (Texas) Express: A "cop" in El Paso arrested a dead man, thinking he was drunk. Hub! Nothing improbable about that. Ever take a drink in El Paso?

LITTLE OPPOSITION. From Obar (N. M.) Progress: At the recent Quay county fair, editor L. L. Kinkead, of Obar Progress, won the magnificent prize offered for the ugliest man, hands down. Rev. Joel Hedgepath was not there.

CLEMENTS A LIVE ONE. From Obar (N. M.) Progress: The election of Geo. H. Clements as president of the Southwestern Editorial association will meet with universal approval. George has had more high-class newspaper experience and knows personally more newspaper people, both east and west, than any other two men in the southwest.

AND HE IS A HUSTLER AND ORGANIZER from way up the creek. If he wasn't, The El Paso Herald would have no use for him.

A FREAK HORSE. From Yuma (Ariz.) Examiner: LOST—One gray, flea-bitten gray,
